- _____ Rabies Vaccine

4 - 6 Months of Age

- _____ Spay or Neuter
- _____ Presurgical Bloodwork Recommended
- _____ Microchip
- _____ Continue Heartworm & Flea Prevention

Please use this as a guide **to plan for** the wellness care that **all** cats should receive during their lifetime. If your pet becomes sick, additional care and testing may be required.

Obesity is a HUGE (no pun intended!) issue in cats! Heart disease, urinary disease and bone and joint problems are worsened by being heavy. Please feed your cat a controlled amount of high quality food and ALWAYS have fresh water available.

Many companies offer pet insurance to cover unexpected (or even expected) medical costs. Check our website under the Links section & go online to determine if this is right for you.

~ Senior at Seven !!! ~

Pets don't age the way people do - they age so much faster. Cats are "senior citizens" by 7 -9 years of age!!! Catch health problems early with routine exams & lab screenings.

1 - 6 Years of Age = The Junior Years

- _____ Annual Exam to Include:
- _____ Weight & Body Score
